

Full Stack Developer at GameBuddy

Do you have a passion for gaming and esports? So do we!

We are creating a platform where players can challenge themselves or their friends about things happening in the game and win awesome prizes. Also we find fitting teammates based on their playstyle and personal preferences. With GameBuddy we're on a mission to connect players all over the world and bring their gaming experience to the next level. To do so, we're looking for a fitting teammate ourselves, that helps us build the gaming community of tomorrow.

Right now more than 150.000 registered users challenging each other, finding fitting teammates and sharing ingame moments in the GameBuddy community for League of Legends. In the future we're going to support more games, such as CS:GO, Dota, Fortnite, Apex and more. Check out more at <https://gamebuddy.gg>

What will you do

You will directly work with the founding team and have a direct impact on the startup strategy. Developing new features for the GameBuddy platform will be your main role in the company.

What we're looking for

- 2+ years of experience in frontend and / or backend development
- You have a strong understanding of the value of user experience
- Self-driven and self organized, not afraid of new challenges and come up with solutions to new problems and technologies
- You keep your promises and you are a teamplayer
- Full time employee 40h / week
- Gender, nationality, etc. doesn't matter, the only requirement is fluency in English and working permission in Germany

Our Tech Stack

- Angular 6 with Typescript
- PostgreSQL, Sails.js and Node.js
- AWS with S3, ECS, RDS; Docker

Development Methodology

User Centric, Agile & Iterative

We work in weekly iterations where we brainstorm, design, implement and evaluate new features every week. The entire team has impact on the development of the product, where we always focus on bringing value to our users. New features are tested directly with our users.

Nice to haves

- B.Sc. or M.Sc. in Computer Science or similar
- Experience in data science
- Experience in working with game API's
- Experience with Docker and AWS

What we can offer

- 👉 Work with really interesting use cases from the esports and gaming industry
- 👉 Join a young esports/gaming start as a first employee and get direct experiences in the startup world
- 👉 A challenging environment with an open feedback culture
- 👉 A transparent company culture with fast decisions and results
- 👉 Strong team spirit
- 👉 Attend gaming events all over the world and call it part of your job
- 👉 Possibility to get equity of the company

Who you will work with

- Niklas - CEO (<https://www.linkedin.com/in/niklashatje/>)
- Julian - CEO (<https://www.linkedin.com/in/julian-suttner-862105113/>)
- Cedric - CTO (<https://www.linkedin.com/in/cedricdeege/>)
- Bardur - Full Stack Developer (<https://www.linkedin.com/in/barrun/>)

Start date? ASAP!

If you are interested, please send your CV (1 page) to julian@gamebuddy.gg

We're happy to hear from you, GGWP!
Niklas, Cedric, Bardur and Julian
